+ Innovation to Address Unique Circumstances for Transportation Projects-Finding Water

ADOT rest areas need a safe and adequate water supply—some locations are in rugged and remote areas—three have utilized remote sensing techniques to locate and successfully develop groundwater.

+ Practical Tools to Analyze and Manage Schedule-Driven Design-Build Projects

Innovative approaches to design-build delivery to expedite procurement and implementation of smaller size (less than \$30 million) projects and programs:

1. Combining multiple small, similar type projects (bridge rehabs or street maintenance, etc) into a single expedited design-build procurement and construction.
2. A streamlined design-build delivery that reduces procurement times and efforts by 50%, but maintains the innovative design-build advantages of Alternative Technical Concepts.

+ Getting Ready for 2015! Join in an Open Discussion with Council members about the effectiveness of the 2014 Campaign and ideas for 2015.

Please join **The Arizona Council on Transportation Innovation (ACTI)** for a seminar series on tools to reduce the time it takes to deliver highway projects, enhance safety, and protect the environment—**part of the FHWA's Every Day Counts Initiative.**
